

Aftercamp instructions

The most important function of the aftercamp is of course to pack the camp and the best would be to do that in a way so the work for the precamp is made as easy as possible. Many things are easier and cheaper to buy in Copenhagen, therefore it is important to know what is in the barn and what needs to be bought before the precamp.

Every woman staying for the aftercamp (for at least 3 working days) gets whatever money spent on transportation refunded, if you bring a car, you can bring it for free on the ferry, if you come for example from Odense, you get both ways paid

Softdrinks are free plus one bottle of wine/week or a beer/day

Important tasks:

Things to go to Copenhagen:

- all the food, all the spices
- coffee machine!!!
- all wine and alcohol
- broken tent parts
- Food folders
- Economy papers
- paper and similar things

Remember: Make lists of what is left of toilet paper, soap, candles, washing up liquid (consumables stuff stored in the barn) and bring them to Copenhagen.

For the precamp:

Pack a emergency kitchen toolbox for the precamp with cutlery, plates, cups, toiletpaper, flasks, things for making coffee and tea (small filter bags), pans, pots,... store it in the freezer close to the back entrance of the barn.

Also place the red table from the bar so it is easy to get.

Tents:

There are bags for most of the tents. They are in the tools tent or in the barn. Remember to put the right tent in the right bag. If there is no bag, write directly on the tent, where it can be easily seen.

Kitchen stuff:

All kitchen tools should be packed in clear bags.

Tools:

They should be cleaned and oiled if needed and packed in old tent pieces.

Rubbish:

Check that all rubbish is in closed bags, otherwise it won't be taken away.

Tools :

Hammer, axes, saves,... remove rust, for example with sandpaper or metal wool. You can get "solarolie" at the smith to protect the tools, or check the tools tent if there should be any. At the end you can pack the

tools in old tent parts. "Spade" and "shovel" should also be cleaned and oiled.

How to take down the tents:

Sleeping tent:

- Loosen the top rope
- Remove pegs of the side, don't hit on the sides!
- Go into the tent and remove the middle polls
- Remove the side sticks, start with the sticks in the middle, than the corners and at last the sticks at the doors
- Remove pegs
- Fold the tent nicely and put it into the right bag

Funktionszelt:

- Remove the side pegs
- Remove the side parts, don't take out the wooden sticks, just roll them up
- Remove the corner sticks and afterwards the rest
- Remove the pegs, start with the corners and move to the middle, only remove the pegs from the small ropes, don't touch the big ropes, make sure that you got them all, don't try to remove pegs by pulling with the ropes, use a peg to bang them on each side
- The roof hangs down on the middle polls
- Release the top rope, only enough that two women can lift the middle sticks
- Remove the elephantfoot the poles stand on, put a rope around the pole to lift it
- Secure the pole with three big pegs, on the opposite side the tent goes down
- Release the top ropes at the opposite side where the tent is going down, on the same side as the pegs
- Every big rope has to be looked after from at least one woman, if the wind allows it one woman can take two ropes, every rope gets a number, if it is very windy there should be women on both sides of the tent, if the weather is calm women on the side opposite the tent goes down is enough
- The person in charge should be on the corner
- Now the ropes can be opened, first on the side it goes down, remove the pegs if there is time for it
- The tent needs to be taken down slowly, it needs to go down straight otherwise the polls are broken, this needs to be controlled by the person in charge
- When the tent is down the rest of the pegs can be removed
- Now the middle pole needs to be removed
- Open the tent parts and spread them out, fold them nicely and put them in the right bag
- The ropes are put on a small side stick, the different ropes must be kept separate
- The top rope should be put together as well
- Keep big and small pegs apart, max 14. pegs in one box, 7 on each side, keep them in wooden or the grey boxes!

Kitchen- and common tent:

- Loosen the ropes...

Please fill out this procedure at the aftercamp 2006!

The barn

The floor in the barn needs to be cleaned before it is laid out with pallets. The space where the pegs will be can be left without pallets. Leave enough space in between (40-80 cm) so the tables can be put up. Put two or three tabletops over each other to make sure they can carry the heavy weight of the things stored on them. Put two tables in front of each other. Make sure you use bukke of the same height. The small pallets can go behind the fridges, also the wheels. Try to fill the space under the tables before the table tops are put

on.

The space at the windows needs to be kept free, so people can go around.

Min height of the barn: 182 cm

The tents is taken down in this order

- Childrens tent
- Workshop tent
- Sleeping tents
- Toilet tent
- Tools tent
- Common tent
- Kitchen tent

Daily tasks during the aftercamp

- breakfast
- dishes
- lunch
- dishes
- dinner
- dishes
- toilet
- clean up the fire places at the beach, pick up cigarette studs and any other dirt
- clean up the places where the tents stood
- check the stock lists

When not needed anymore these things are moved to the barn:

- clean the toilet buckets, only leave 2 or 3
- tables and chairs
- remove any leftover wood
- empty red water buckets
- empty bins
- bikes
- kayaks, surfers, big boat
- massage table and any other bits standing around

Towards the end of the aftercamp:

- take down outside shower
- remove washing up unit, drying thing
- check lists and floorplan
- return gas bottles
- get rid off the paper, bottles
- at least 6 women is needed to take the toilet wagon of the red feet!!!

Last day:

- clean up toilet wagon
- switch off the water at the end of the road
- pick up cph stuff from the barn
- leave the island clean
- get leftover tickets on the ferry

Suggestion for working plan

Don't start all the tents, take one and finish one!

- Prepare the barn. Move the tables and pallets to the barn, keep tabletop off the kitchenstuff table, so it is easier to get the pegs in
- Some of the halfpallets can go behind the fridges, to keep the kayaks from the floor, the wheels can go there as well
- Move big sailing boat to the barn
- Childrens tent: Pack toys in transparent binbags also pack the toys from the tools tent
- Tools tent: Pack the camping gear, little wooden femø chairs and lifewests, keep some

Note: any broken tentparts and all the drums go to Copenhagen, also the wetsuit if found

Pack stuff

- Green and blue chaircushions whenever they are dry, leave what is needed for rest of the camp
- Chairs can be put away, leave what we need

Note: make notes from what you pack, there are special lists

Take down childrens tent, workshop tent and as many sleeping tents as possible

Move to the barn:

- massage table
- any other tables we don't need, leave the red table
- football goals, volleyball net and construction
- pegs any other boards lying around

Toolstent

Clean up small tools, leave any hammer plus one axe, working gloves (put similar tools with each other and count the tools)

Clean up where the tents stood and bring the stones which are lying around on the campground back to the beach

Empty as many fridges as possible and move them to the barn, fill them up with left over toilet paper, bin bags, candles, washing up liquid,... they go in the back of the barn between table two and three

Clean toilet bins, only leave 3 toilets

Clean toilet tent and take it down

Move bikes and children wagons in the dark room, sunshades can go as well

Clean up the kitchen, leave what is needed for the rest of the aftercamp

note: start with preparing the stuff needed for the rest of the aftercamp, the coffee machines plus filters goes to Copenhagen

Kitchen checklist:

- 3 plates/person
- 2 mugs/person

- 2 glasses/person
- 3 sets of cutlery/person
- 1 medium waterpot
- 3 small pots
- 2 medium frying pans
- 5 metalbowls
- various tools and knives (wisk, grater, knives, big spoons,...)
- 6 washing up bowls

Take down tools tent, move the stuff going to Copenhagen to the kitchen tent, the food can be covered to stay outside

Take down the kitchen as soon as it is dry

Move kajaks and surfers to the barn

Clean out economie cupboard and move it to the barn

Take down common tent

Take down bivouacs

Outside shower

Washing up unit

Fix the flipping lists

Get rid off rubbish, bottles and paper

Get petrol

Bring back gas bottles

Food boxes, visit people from the island with the food boxes to say thank you

- Gas Knud
- Else Magrethe
- and her neighbour, she owns the road to the back of the barn
- Post woman
- Anybody else who helped the camp over the summer

Clean up toilet wagon

Drop off the last gas bottles

Switch off the water at the end of the road

Pick up cph stuff from the barn

Leave the island clean, so go for a last swim for this summer

Get leftover tickets on the ferry

Vocabulary:

Barneting - kids stuff

Legetøj - toys

Wc spande - toiletbuckets

Brandudstyr - fire extinguisher

Småværktøj - small tools

Repkasser - repair kits

Køkkenting - kitchen stuff

Køle- og fryseskabe - fridges and freezers

Lys - candles

Arbejdshandsker - working gloves
