

Aftercamp instructions

The most important function of the aftercamp is of course to pack the camp so the work for the precamp is made as easy as possible. Many things are easier and cheaper to buy in Copenhagen, therefore it is important to know what is in the barn and what needs to be bought before the precamp. Every woman staying for the aftercamp (for at least 3 working days) gets whatever money spent on transportation refunded, if you bring a car, you can bring it for free on the ferry, if you come for example from Odense, you get both ways paid. Soft drinks are free plus one bottle of wine/week or a beer/day

Important tasks:

Things to go to Copenhagen:

- all the food, all the spices
- coffee machine!!!
- all wine and alcohol
- broken tent parts
- Food folders
- Economy papers
- paper and similar things

Remember: Make lists of what is left of toilet paper, soap, candles, washing up liquid (consumable stuff stored in the barn) and bring them to Copenhagen.

For the precamp:

Pack an emergency kitchen toolbox for precamp with cutlery, plates, cups, toilet paper, flasks, things for making coffee and tea (small filter bags), pans, pots,... store it in the freezer close to the back entrance of the barn. Also place the red table from the bar so it is easy to get.

Tents:

There are bags for most of the tents. They are in the tool tent or in the barn. Remember to put the right tent in the right bag. If there is no bag, write directly on the tent, where it can be seen easily.

Kitchen stuff:

All kitchen tools should be packed in clear bags.

Tools:

They should be cleaned and oiled if needed and packed in old tent pieces.

Rubbish:

Check that all rubbish is in closed bags, otherwise it won't be taken away.

Tools :

Hammer, axes, saws,... remove rust, for example with sandpaper or steel wool. You can get "solarolie" at the smith to protect the tools, or check the tool tent. At the end you can pack the tools in old tent parts. The spade and the shovel should also be cleaned and oiled.

How to take down the tents:

Sleeping tent:

- Loosen the top rope
- Remove pegs at the side, don't hit the sides!
- Go into the tent and remove the middle poles
- Remove the side poles, start with the poles in the middle, then the corners and lastly the poles at the entrances
- Remove pegs
- Fold the tent nicely and put it into the right bag

Tool tent:

- Remove the side pegs
- Remove the side parts, don't take out the wooden poles, just roll them up
- Remove the corner poles and then the rest
- Remove the pegs, start with the corners and move to the middle, only remove the pegs from the small ropes, don't touch the big ropes. Make sure that you get them all, don't try to remove pegs by using the ropes, but use a peg to bang them on each side
- The roof hangs down on the middle poles
- Release the top rope, only enough that two women can lift the middle poles
- Remove the elephant feet that the poles stand on, then put a rope around the pole to lift it
- Secure the pole with three big pegs. The tent will come down on the opposite side
- Release the top ropes on the opposite side to where the tent is coming down, on the same side as the pegs
- Every big rope has to be looked after by at least one woman. If the wind allows it one woman can take two ropes Each rope gets a number. If it is very windy there should be women on both sides of the tent,
- if the weather is calm women on the side opposite to where the tent comes down is enough
- The person in charge should be on the corner
- Now the ropes can be untied, first on the side coming down. Remove the pegs if there is time to do so
- The tent needs to be taken down slowly, it needs to go down straight otherwise the poles will break. This needs to be checked by the person in charge
- When the tent is down the rest of the pegs can be removed
- Now the middle pole needs to be removed
- Open the tent parts and spread them out, fold them nicely and put them in the right bag
- The ropes are put on a small side pole. The different ropes must be kept separate
- The top rope should be put together as well
- Keep big and small pegs apart, max 14. pegs in one box, 7 on each side, keep them in wooden boxes or the grey crates!

Kitchen- and common tent:

- Loosen the ropes...

Please fill out this procedure at the aftercamp 2006!

The barn

The floor in the barn needs to be cleaned before it is laid out with pallets. The space for the pegs can be left without pallets. Leave enough space in between (40-80 cm) so the tables can be put up. Put two or three tabletops over each other to make sure they can carry the heavy weight of the things stored on them. Put two tables in front of each other. Make sure you use table supports of the same height. The small pallets can go behind the fridges, along with the wheels. Try to fill the space under the tables before the table tops are put on. The space at the windows needs to be kept free, so people can access it.

Min height of the barn: 182 cm

The tents are to be taken down in this order

- Childrens tent
- Workshop tent
- Sleeping tents
- Toilet tent
- Tool tent
- Common tent
- Kitchen tent

Daily tasks during the aftercamp

- breakfast
- dishes
- lunch
- dishes
- dinner
- dishes
- toilet
- clean up the fire places at the beach, pick up cigarette stubs and any other litter
- clean up the areas where the tents stood
- check the stock lists

When not needed anymore these things are moved to the barn:

- clean the toilet buckets, only leave 2 or 3
- tables and chairs
- remove any leftover wood
- empty red water buckets
- empty bins
- bikes
- kayaks
- massage table and any other bits standing around

Towards the end of the aftercamp:

- take down outside shower
- remove washing up unit, drying racks
- check lists and floor plan
- return gas bottles
- get rid of the paper, bottles
- at least 6 women are needed to take the toilet wagon off the red feet!!!

Last day:

- clean up toilet wagon
- switch off the water at the end of the road
- pick up cph stuff from the barn
- leave the island clean
- get leftover tickets on the ferry

Suggestion for working plan

- Don't start all the tents, take one and finish one!
- Prepare the barn. Move the tables and pallets to the barn, keep tabletop off the kitchen stuff table, so it is easier to get the pegs in
- Some of the half-pallets can go behind the fridges, to keep the kayaks from the floor, the wheels can go there as well

Children's tent:

- Pack toys in transparent binbags also pack the toys from the tools tent
- Through out what is broken

Tools tent:

- Pack the camping gear, little wooden femø chairs and lifewests, keep some

Note: any broken tent parts and all the drums go to Copenhagen, also the wetsuit if present

Pack stuff

- Chair cushions whenever they are dry, leave what is needed for rest of the camp
- Chairs can be put away, leave what we need

Note: make notes of what you pack, there are special lists

Take down children's tent, workshop tent and as many sleeping tents as possible

Move to the barn:

- massage table
- any other tables we don't need, leave the red table
- football goals, volleyball net and construction
- pegs, any other boards lying around

Tools tent

- Clean up small tools, leave any hammer plus one axe, working gloves (put similar tools with each other and count the tools)
- Clean up where the tents stood and bring any stones lying around on the campground back to the beach
- Empty as many fridges as possible and move them to the barn, fill them up with left over toilet paper, bin bags, candles, washing up liquid,... they go in the back of the barn between table two and three
- Clean toilet bins, only leave 3 toilets
- Clean toilet tent and take it down
- Move bikes and children wagons in the dark room, sunshades can go as well
- Clean up the kitchen, leave what is needed for the rest of the aftercamp
- note: start preparing the stuff needed for the rest of the aftercamp, the coffee machines plus filters goes to Copenhagen

Kitchen checklist:

- 3 plates/person
- 2 mugs/person
- 2 glasses/person
- 3 sets of cutlery/person
- 1 medium waterpot
- 3 small pots
- 2 medium frying pans
- 5 metal bowls
- various tools and knives (whisk, grater, knives, big spoons,...)
- 6 washing up bowls

Take down tool tent, move the stuff going to Copenhagen to the kitchen tent, the food can be covered to stay outside

- Take down the kitchen as soon as it is dry
- Move kayaks to the barn
- Clean out economy cupboard and move it to the barn
- Take down common tent
- Take down bivouacs
- Outside shower
- Washing up unit
- Get rid of rubbish, bottles and paper
- Get petrol
- Bring back gas bottles

Food boxes, visit people from the island with the food boxes to say thank you

- Gas Knud
- Else Magrethe
- and her neighbour, she owns the road to the back of the barn
- Anybody else who helped the camp over the summer

- Clean up toilet wagon
- Drop off the last gas bottles
- Switch off the water at the end of the road
- Pick up cph stuff from the barn
- Leave the island clean, so go for a last swim for this summer
- Get leftover tickets on the ferry

Vocabulary:

Barneting - kids stuff

Legetøj - toys

Wc spande - toilet buckets

Brandudstyr - fire extinguisher

Småværktøj - small tools

Repkasser - repair kits

Køkkenting - kitchen stuff

Køle- og fryseskabe - fridges and freezers

Lys - candles

Arbejdshandsker - working gloves
